

IN THE TITLE

Please amend the title of the subject U.S. patent application, as constituted by the verified translation of PCT/EP2005/050359, as follows:

Devices for adjusting contact pressure exerted on an adjacent ~~rotating~~rotational body by a roller in a roller strip and/or for arranging the~~engaging said~~ roller on the rotational body and/or for disconnecting the cylinder~~disengaging said roller~~ from the ~~rotating~~rotational body

IN THE SPECIFICATION

Please cancel the entire specification of the subject U.S. patent application, as filed, including the List of Reference Symbols, as constituted by the verified translation of PCT/EP2005/050359 in favor of the concurrently submitted Substitute Specification. That substitute specification is the result of the entry into the verified translation of a suitable cross-reference to related applications and of suitable section headings, the deletion of the List of Reference Symbols and of references to the claims, the correction of minor errors in phrasing, grammar and punctuation, and a general revision of the verified translation to place the Substitute Specification more in a form in accordance with U.S. practice. These changes do not constitute any new matter. A marked-up copy of the verified translation, showing the changes made thereto, to arrive at the Substitute Specification, is enclosed for the Examiner's review.
